

POLY FLUORO LTD.
Performance Plastics

About Poly Fluoro

Poly Fluoro Ltd. is one of India's leading processors of engineering plastics and an established ISO 9001:2000 company. Over the past 15 years we have developed our products to suit applications in numerous industries including automotives, machine tool building, biotech, heavy electricals, medical equipments, fluid control and infrastructure.

Our current product portfolio includes:

- Bearings – linear slideway bearings, bush bearings as well as bridge bearings
- Tubes – for industrial and medical applications
- Engineered components – both CNC machined as well as conventionally machined parts
- Tapes and sheets – both thin tapes for insulation and thicker sheets for gaskets and linings

Careers at Poly Fluoro Ltd.

Poly Fluoro has always prided quality over quantity. We prefer to hire people with the capacity to learn, lead and achieve within their preferred line of work. Our employees are encouraged to take ownership of everything they work on – be it executing a large order or conducting an internal workshop.

We seek people who wish to grow with the company as we believe that no one likes to remain in the same role for very long. We encourage employees at all levels to outline their preferred career path within the company and help them move along this path.

We currently seek qualified professionals in the following departments:

Admin

Front office executives
Executive assistants
